

PICKLEBALL DEN

THE TECHNOLOGY POWERING THE SPORT

WELCOME 2023

As the technology powering the sport, one of our top priorities here at Pickleball Den is providing quality software to players. To achieve this, we focus extensive time and energy on producing comprehensive solutions that are reliable and easy-to-use. We rely on your feedback to ensure that we continue to innovate and improve.

We also know the value of empowering our players, club managers, tournament and league directors to take control of their play, their clubs, and the events they plan. With our library of help videos and our full time customer support staff, we are committed to providing you with any additional help you need. We pride ourselves on quality overall, and we hope you've noticed.

But one other thing that we feel separates us from our competition is we are here for individual clubs and tournament directors. We don't divert our attention on hosting big events, we just concentrate on providing quality software to clubs and tournament directors.

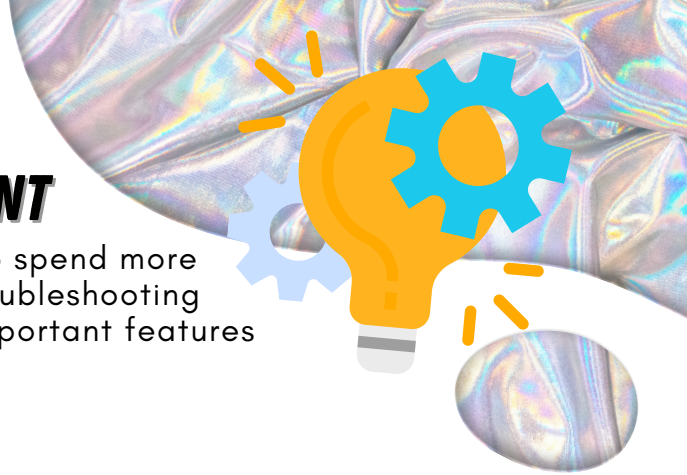

We know that clubs at the local level are unique in how they organize their groups and their events. This is something that we not only accommodate, but also highly respect about clubs. At the heart of the sport are passionate players who enjoy meeting other wonderful players at the events they run, host, or attend. We know that playing in events is not always about the ratings, it's about the people and the sport.

For us, 2023 will be filled with new technology, new connections, and new advancements. We look forward to getting to know more clubs, tournament directors, and players!

Happy New Year!
